

# THE ECONOMICS OF CHILD ABUSE

## A STUDY OF SOLANO COUNTY

Child abuse is a persistent problem within Solano County and the greater Bay Area. Although it is a hidden social ill, its impact is significant. A single incidence of child abuse impacts not just the child, but the family, the community, and society at large. In fact, child abuse is a core underlying factor to many of the ongoing struggles of this community, such as dropout rates, homelessness, high incarceration, and health concerns.

The devastating physical, mental, and emotional effects of abuse persist long after maltreatment occurs, and result in ongoing costs to every sector of our community. This report brings to light this largely ignored issue, and the negative impact it has on all of us.

## THE IMPACT OF CHILD ABUSE

### COST EXPLANATION

The lifetime economic burden per victim is \$232,311 which is an indication of the financial importance to Solano County of preventing a single child from becoming a victim. The total annual economic burden of child abuse in Solano County is \$110.8 million. That amount could send 1,000+ kids to college.

### THE STATISTICS

There are 3.5 million reports of child abuse made in the U.S. each year, involving 6 million children

There are ~58,000 reports of child abuse made in the Bay Area every year.

That means every 10 minutes a report of child abuse is made in the Bay Area.

### COSTS TO SOLANO COUNTY:

**477** | VERIFIED CASES IN SOLANO COUNTY  
X **\$232,311** | COST PER VICTIM OVER THE COURSE OF THEIR LIFETIME

**\$110.8** MILLION

### COSTS TO BAY AREA:

COST TO 10 COUNTIES USING VERIFIED CASES OF ABUSE

**\$2.2** BILLION

GIVEN THAT CHILD ABUSE IS VASTLY UNDER-REPORTED. **THE ANNUAL ECONOMIC BURDEN TO THE BAY AREA COULD BE AS HIGH AS**

**\$62.8** BILLION

# BREAKDOWN OF \$232,311

## LIFETIME PRODUCTIVITY

Victims are more likely to be unemployed and rely on public assistance and may face barriers to employment, which lead to diminished earning potential throughout adulthood.

## EDUCATION

Abused children are 77 percent more likely to require special education.

## CHILD WELFARE

Victims may require intervention services, foster care, and counseling services.

## CRIMINAL JUSTICE

Abused children are 59 percent more likely to be arrested as juveniles, and 28 percent more likely to have an adult criminal record.

## HEALTHCARE

Victims may require hospital care, mental health services, and other medical services throughout childhood, and have a higher incidence of chronic health problems, mental health issues, substance abuse, and risky sexual behavior throughout adulthood.

## CHILDREN'S NETWORK

The Children's Network has been improving the lives of children in Solano County for over 30 years by working in collaboration with many organizations, providing direct services to Solano County families, including the Family Resource Center Network. We provide support to the Solano Children's Alliance and Child Abuse Prevention Council, the longest continuously functioning multi-disciplinary children's service council in California. The Alliance analyzes budgets and policies, makes recommendations to local and state leaders, and identifies areas of need for children's services. As the acting Child Abuse Prevention Council, the Alliance is responsible for raising awareness and educating the community about how to recognize and report suspected child abuse and neglect, advocating for effective child abuse prevention programs, and being a champion for the cause of child protection. We protect Solano County children by supporting protective factors and working to end child abuse.

## FAMILY PROTECTIVE FACTORS

Research is proving that there are five commonalities that healthy families, free from abuse, share. These five protective factors can be supported and strengthened within vulnerable families to combat risk factors (history of abuse, isolation, community violence, etc.) and prevent incidences of child abuse.

### SOCIAL & EMOTIONAL COMPETENCE OF CHILDREN

Family and child interactions that help children develop the ability to communicate clearly, recognize and regulate their emotions, and establish and maintain relationships

### KNOWLEDGE OF CHILD DEVELOPMENT

Understanding parenting strategies that support physical, cognitive, language, social, and emotional development

### PARENTAL RESILIENCE

Managing stress and functioning well when faced with challenges, adversity, and trauma

### SOCIAL CONNECTIONS

Positive relationships that provide emotional, informational, instrumental, and spiritual support

### CONCRETE SUPPORT

Access to concrete support and services that address a family's needs and help minimize stress caused by challenges
